

**NEW ENGLAND SOCIETY
OF AMERICAN FORESTERS**

2022 AWARDS

and

MEMBER RECOGNITION

Brad W. Simpkins

Peter Farrell

Stephen Eisenhaure

R. Alec Giffen

Brad W. Simpkins *Distinguished Service Award*

The Distinguished Service Award is the highest award given by the New England SAF, recognizing professional achievement in forestry, irrespective of age or tenure, by a New England SAF member.

Brad began a 22-year career, for the NH Div. of Forests & Lands in 1998, starting out as a forest technician managing timber sales, he then progressed to become a forest ranger, and then Chief of Forest Protection. At age 35, he was appointed to become the State Forester, serving in that position for 11 years, under 3 different governors. Currently, Brad is employed with the USDA Forest Service as the Cooperative Wildland Fire Specialist covering the 6 New England states and New York.

His education consists of a B.S. in Environmental Resource Management with a forestry concentration from Penn State Univ. and a M.B.A. from Plymouth State University.

Focusing on his time as the State Forester, the nomination letter states, “To the public and policy makers he was the “face of forestry” in the state, effectively communicating the importance of the forest resource in NH, the state’s third largest industry, after high tech and tourism. In dealing with funding for the Division, he was not a didactic bulldog, but rather a calm and persuasive presence, successfully maintaining state and federal funding, as well as the positive morale of the staff.

“A small warning first, I’m not focusing on the details of his service, since I’m assuming the rest of the nomination packet will get those details right. What I won’t get wrong, however, is my enthusiasm for Brad’s nomination, nor my heartfelt belief that he is most deserving of this recognition,” so stated a letter of endorsement. This continued with, “He is a “quick study” learning the people and the issues and effectively responding to them. I have seen him stand his ground when it would be easier to “give in.” He isn’t dogmatic, however, and listens and adapts. He has an “open door” approach to work and seems to never tire. Brad is likable, a listener, decisive, responsive, competent, intelligent, patient, fair, open, and honest.”

Brad has been previously honored with other recognitions, including the NESAF Mollie Beattie Award in 2011, the Union Leader’s “40 under 40” class of 2007, and the NH Timberland Owner’s Association President Award in 2021. He has served or is serving on a variety of advisory groups and committees, including the UNH Forest Advisory Board, the UNH Thompson School, NH Board of Forester Licensing, and as a member of the Society for the Protection of NH Forests Forestry committee.

Another letter of endorsement commented that during his tenure as Director of the Division of Forests and Lands, Brad led the agency through the development of the 2010 Forest Action Plan and initiated the revision of the 2020 Forest Action Plan. Further, “As State Forester, Brad was a staunch advocate of the forest products industry, for sustainable forestry, and of the need to protect and conserve important landscapes and natural areas. Brad is highly respected for his understanding of the challenges and opportunities facing our forests today, and his ability to communicate those challenges and opportunities to diverse audiences.”

Distinguished Service Award Recipients

1966 – Phillip Coolidge	1967 – George Garratt	1968 – Gerald S. Wheeler
1969 – David M. Smith	1970 – Austin Wilkins	1971 – John Noyes
1972 – Albert Nutting	1973 – Robert Dinneen	1974 – Arthur Heitman
1975 – Herschel Abbott	1976 – Morris Wing	1977 – Theodore Natti
1978 – James Wilkinson	1979 – Ernest Gould	1980 – Max McCormack, Jr.
1981 – Raymond Foulds	1982 – Howard Mason	1983 – Philip Rich
1984 – Michael Sikora	1985 – Gibb Dodge	1986 –
1987 – Clifford Swenson	1988 – Peter Hannah	1989 – Lester A. DeCoster
1990 – Robert B. Fiske	1991 – Fred B. Knight	1992 – Thomas F. Quink

2017 – Everett L. Towle	2018 – Ronald C. Lemin, Jr.	2019 – Si Balch
2020 – Karen Bennett	2021 – John W. McNulty	

James W. Toumey Outstanding Service Award

*The James W. Toumey Award is given for outstanding achievement in service to the New England Society of American Foresters. Toumey was one of the founding fathers of the New England Section in 1920, author of **Seeding and Planting** and **Foundations of Silviculture**, one of the first two regular staff members at the Yale School of Forestry. Henry S. Graves noted in a memoriam “Almost at once he took a prominent place in the forestry movement and throughout his career was in the foremost ranks of the leaders of the profession.*

James W. Toumey Award Recipients

1989 – James Wilkinson, Jr.	1990 – Fred B. Knight	1991 – A. Bradford Wyman
1992 –	1993 – David B. Kittredge	1994 – Max McCormack, Jr.
1995 – Russell S. Reay	1996 – Gary F. Salmon	1997 – James B. Cullen
1998 – Joseph C. Mawson	1999 – Philip Bryce	2000 –

2019 – Tim Fleury	2020 – Kris Hoffmann	2021 – Lloyd C. Irland

Ernest M. Gould Jr. Technology Transfer Award

The Ernest M. Gould Jr. Technology Transfer Award is given for outstanding contributions to natural resource science and management through education, extension, or youth service. Gould achieved wide acclaim for his expertise in analyzing and resolving forest resource policy issues while on the faculty of Harvard University. He was a graduate of the University of New Hampshire.

Ernest M. Gould Jr. Award Recipients

1989 – Stephen Broderick	1990 – Stanley Knowles	1991 – Christina Petersen
1992 – William B. Leak	1993 – Christopher Murdock	1994 – Thomas J. McEvoy
1995 – Ancyl Thurston	1996 – Virginia Barlow	1997 – Donald W. Quigley
1998 – Phil Auger	1999 – David Kittredge, Jr.	2000 – Elizabeth Postlewaite

2019 – Laura S. Keneefic	2020 – Paul Catanzaro	2021 –

Mollie H. Beattie Young Forester Leadership Award

*The Mollie H. Beattie Young Forester Leadership Award is presented to a member of NESAF less than 40 years old who has shown leadership in a program or project benefiting the practice of forestry. Beattie was Vermont Commissioner of Forests, Parks, and Recreation, Deputy Secretary of the Agency of Natural Resources, and ultimately became Director of the U.S. Fish and Wildlife Service. Beattie was active in SAF. She co-authored **Working with Your Woodland**; she is remembered for her tireless devotion to conservation, integrity, and quiet courage.*

Mollie H. Beattie Young Forester Leadership Award Recipients

1989 – Charles Levesque	1990 – David Kittredge, Jr.	1991 – Charles Niebling
1992 – Anne Marie Loud	1993 – Alan Calfee	1994 – Carrie Tripp
1995 – Carol Redelsheimer	1996 – Robert Ricard	1997 – Patrick D. Hackley
1998 –	1999 – Kevin Evans	2000 – Sara Packer
2001 – Cynthia S. Wood	2002 – Tom O’Shea	2003 – David Irvin
2004 –	2005 – Amanda Farrar	2006 – Laura Keneefic
2007 – Ben Machin	2008 –	2009 – Margaret Machinist
2010 – Jacob W. Metzler & Spencer R. Meyer	2013 – Jessica Leahy & William Van Doren	2011 – Brad W. Simpkins
2012 – Joseph (J.P.) Barsky	2015 – Kathryn T. Manende	2016 – Wendy Weisiger
2014 – Andrew Fast	2018 – Eric Hansen	2019 – Kyle Burdick
2017 – Anthony (Tony) D’Amato	2021 – Nicole S. Rogers	
2020 – Amanda Mahaffey		

Peter Farrell

Austin Cary Practicing Professional Award

The Austin Cary Award recognizes New England SAF members who have shown exceptional achievement as practicing forest managers. Austin Cary (1865–1936) graduated from Bowdoin College and introduced northern landowners to forest sampling, growth estimation, and simple silvicultural techniques. Cary’s Woodsman’s Manual, written in 1909, continued to be used as a textbook until the 1960’s.

The nomination letter was a joint effort by three individuals from the Society for the Protection of NH Forests, who noted that since 2002 they have worked with Peter on 13 harvests covering 670 acres and stumpage income of over \$330,000. Their quotes include, “A walk in the woods with Peter always leaves me with something new to think about. He puts much thought into applying the best silviculture with the right operator on every job. Forestry is a relationship-based industry, and those relationships are what leads to success in managing our lands. Peter exemplifies this kind of trusted long-term relationship that we rely on to put good work on the ground.” “Peter is a colleague and trusted mentor to me. I was just getting started as a forester and remember fondly the conversations we had about the profession in his sugar shack, while the steam was rising from his evaporator. His computer programs are one of a kind, being custom built. He would use these to account for timber sale transactions past and present, as well as timber inventory and management plan action data.” “Working with Peter on a timber harvest is always enjoyable. He has a thoughtful and intelligent way of thinking about forestry and is always thinking critically about the silviculture that we are trying to accomplish on the ground. He has a strong knowledge of forest product markets and is skilled at laying out a harvest to accomplish our objectives, and to protect sensitive natural resources. He is also an excellent communicator.”

Peter is the district manager for the New England Forestry Consultants, Inc. (NEFCO) Lakes Region Center, where he has been employed since its formation in 1994, and his client working circle covers central NH. He is a graduate of Franklin & Marshall College (BA) and a 1977 MF from Duke University. He was the NEFCO Treasurer until 2008, and in that role, he was responsible for the design, programming, and implementation of the Forest Pro/Landbase software that continues to work as the critical administrative and forest management planning system. In addition, he is an Association of Consulting Foresters member, served his community as a school board member, is a member of the NH Forest Advisory Board, and was on the technical team for the publication of *Good Forestry in the Granite State*. He has served on the Granite State Division executive committee as Chair and Policy Chair.

An endorsement notes that, “Peter is a consummate professional, who holds a high ethical standard for both his personal and professional lives. This has resulted in a long work history of showcase forestry in the Lake Region of NH. Ever supportive and constantly there as a sounding board, I consider myself fortunate to have been professionally associated with Peter for the last two decades,” as noted in a letter of endorsement. Peter’s land ethic is not swayed by short term considerations and even in the last years of managing private timberlands, his goal is always to leave a healthier, sustainable resource for the future.”

In the other endorsement letter, “He is first and foremost a field forester focused on long-term sustainability, getting the job done, but all the while thinking and questioning – for example: How might the work at hand be done more effectively and more efficiently? What is really happening on a woodlot, and how can silviculture be improved? and What is truly sustainable forestry, and how can it be measured practically to serve as a guide for action? Peter is not one to blow his own horn, yet he speaks clearly, and is an eloquent and concise writer. He is essentially a private person, yet a true team player. Never one for spending much time at meetings, he has served when it matters.”

Austin Cary Award Recipients

1989 – Lynn Levine
1992 – Paul Memmer
1995 – John McNulty
1998 – Charles Moreno
2001 – Anne Marie Kittredge
2004 – Leland H. Sanders
2007 – George F. Ritz
2010 – John A. O’Brien

2018 – Elizabeth (Betsy) Lesnikoski
2021 –

Stephen Eisenhaure

David M. Smith Award

The David M. Smith award recognizes a New England SAF member engaged in research, teaching, or the field application of silviculture, whose work reflects Dave's advice that "we should observe and analyze the patterns of stand development first, and devise silvicultural treatments to fit or modify them afterwards."

Teaching is a valuable service that Steve provides to UNH and its students. In a formal academic setting, he taught the forest mensuration course to Forest Technology students at the Thompson School of Applied Science for approximately 15 years. Gathering stand data is an extremely important part of the forest management process. A forester cannot make good silvicultural decisions without accurate information. Due to changes in the program, Steve now assists in the forest harvesting course. As part of his duties, Steve coordinates all research that is done on the UNH Woodlands. This research is conducted not only by the UNH forestry program, but by many other non-forestry programs on campus, making sure that the research is monitored and does not overlap. His knowledge on the UNH woodlands helps researchers find the forest stand types/communities that they need for their research, or by using the school's timber harvesting class or the summer crew, he creates the desired forest stands that meet the needs of researchers for a specific project. He has also developed a system of continuous forest inventory plots covering 80% of the UNH's 3,000 plus acres of forest, to facilitate long term management objectives.

Steve's career began in an around about route to forestry. In 1993, he received a BA degree in Business Administration and after several years in retail decided that there might be other career paths. His love for fly fishing took him to Idaho, where he worked several seasons as a wildland firefighter, and realized that forestry was a possible career. Returning to UNH, he enrolled and graduated from the Thompson School of Applied Science in 2004. By happenstance, the UNH Woodlands Manager position was open and available to a Master degree student, Steve accepted the position and graduated with a MS degree in forestry in 2006. The Dean of the College was so impressed with Steve's work that he created a new full-time position of Land Use Coordinator, a position that Steve has held for the last 15 years. He is active in the forest community, serving six years on the Board of Directors of the NH Timberland Owners Association, and positions on the Granite State Division executive committee. Steve is also active in the Eastern Region Research Forest Managers group, which meets at a different research forest for tours to learn about forest management in that region.

An endorsement comments that, "Steve has tackled some very interesting projects. Some of his own design and some in concert with researchers from the UNH campus, the USDA Forest Service station in Durham, NH, the NH Division of Forests and Lands, and UNH Cooperative Extension. Under Steve's tenure researchers from many agencies have begun to recognize UNH lands as fertile grounds for carefully crafted forest research. Along with these projects, he has started to develop on-going demonstration areas on UNH land, showing examples of traditional as well as climate change adaptive silviculture."

The other endorsement is from a former student, who notes, "Steve was my teacher for the mensuration class. While he would be the first to tell you that classroom teaching isn't his greatest strength, I found his class to be engaging and effective. He wasn't afraid to experiment with his class structure to make more efficient use of classroom and field time, which I felt at the time, and still do, showed his dedication to improvement as an educator. He clearly cares about passing on forestry knowledge to others."

R. Alec Giffen

Integrity in Conservation Award

The Integrity in Conservation Award recognizes an individual or organization working with natural resources who demonstrates adherence to principles and high standards in the face of adversity.

His biographical sketch is headlined with the phrase, “Forester with special expertise in climate change issues.” Alec currently works for the New England Forest Foundation (NEFF) and the Clean Air Task Force (CATF). For NEFF, he serves as their Maine representative and works on a number of specific projects; for example, efforts to accelerate the pace of conservation in Maine, efforts to define “exemplary forestry,” and increase the use of wood in construction. For CATF, he serves as a Senior Science and Policy Fellow, heading up the Clean Air Task Force’s efforts on the role that forests can play in reducing air pollution and mitigating climate change.

Educated as a forest scientist, he has degrees from the Univ. of Maine and the Univ. of California, and over four decades of experience as a natural resource planner/program administrator. Most recently he was the Director of the Maine Forest Service, where his focus was to increase the understanding and promote the role that forests in Maine and the nation can play to reduce global warming. Other previous positions include time as a CEO of a natural resource consulting business that specialized in planning and conflict resolution, handling cases across the USA and directing Coastal Zone Management and Water Resource Planning at the ME State Planning Office.

“His work has often placed him front and center on controversial issues, forging alliances by appealing to those on all sides with the reminder that we all want the same thing: well-managed forests that meet our needs, not only now, but for generations in the future. Throughout it all, he remains a well-informed, articulate, and persuasive advocate for doing the right thing in all aspects of natural resource management,” states an endorsement letter.

Over the course of his professional career, Giffen has been involved in finding solutions to a number of difficult and complex natural resource issues, including wildland planning and regulation, critical area identification, coastal zone management, shoreland protection, and river and lake conservation and development policy. In 2006-2007, he chaired the ME Governor’s Wind Power Task Force, which successfully championed efforts to modernize and rationalize Maine’s licensing of wind power projects.

A second endorsement letter focused on Alec’s work with carbon trading schemes and the criticism focusing on the additionality of carbon benefits. “By codifying Exemplary Forestry Standards in New England and modeling the carbon and wood productivity, Alec has demonstrated that the carbon savings from these practices will not leak. In other words, exemplary forest management allows us to grow more wood and build up carbon stocks at the same time. As the investigation and tuning of carbon practices matures, leakage is destined to become a primary issue. Alec’s work has anticipated this problem and New England foresters and landowners will benefit from his foresight. This may prove to be his greatest contribution to the near and long-term success of New England forestry.”

The nomination letter closes out with, “The upshot is that Alec’s work has now positioned the forests of the New England region to play a leading role in mitigating climate change. His sound scientific foundation withstands critical challenges and the tools he has invested in creating are “shovel-ready”. By linking the need for forestry incentives to the benefits for climate change, Alec is on the path to solving economic obstacles which have stalled the broader implementation of proven effective silvicultural practices.”

Integrity in Conservation Award Recipients

1998–Max McCormack, Jr.
2001–
2004–David Houghton
2007–Richard Carbonetti, Peter Condaxis, William Samal, and Jonathan Wood

SAF Fellows

Listing of current NESAF members (Year Elected, Name)

Current Fellow criteria require both of the following: 1) A strong commitment through direct SAF volunteer activities, and 2) exemplary action, sustained leadership, and advancement of the forestry profession in at least one of the following areas: a) application of forestry, b) education, c) public policy, d) research, or e) technology transfer. Both criteria need to be typically demonstrated and performed at two or more levels (local, state, regional, national, or international).
