Joseph Orefice ***Jeff Ward***

Jeremy Turner

Austin Cary Practicing Professional Award

The Austin Cary Award recognizes New England SAF members who have shown exceptional achievement as practicing forest managers. Austin Cary (1865–1936) graduated from Bowdoin College and introduced northern landowners to forest sampling, growth estimation, and simple silvicultural techniques. Cary's Woodsman's Manual, written in 1909, continued to be used as a textbook until the 1960's.

The nomination letter for Jeremy was a joint effort from the Society for the Protection of New Hampshire Forests (SPNHF), together they have been working for over 20 years, covering a lot of ground, and having a meaningful and positive impact on the Society lands.

Jeremy currently serves as the Managing Forester for Meadowsend Consulting Company where he has worked for the past 25 years. He leads a team of foresters that manages 30,000 of Company lands and an additional 100,000 acres of other clients. In 1994, Jeremy received an A.S. Degree in Forest Technology from the Thompson School. He then began work for Meadowsend as an intern in the summer of 1994 at the commensurate wage of $3.00 per hour, and the start of a 25+ year career. Continuing his education, he then proceeded to graduate cum laude two years later, from UNH with a B.S. degree in Forest Management. He is currently licensed in NH and VT, a Certified Tree Farm Inspector, previous member of NHTOA, and since the early days, an active member of the Forest Stewards Guild.

The endorsement letter from the logging services company of D.H. Hardwick & Sons, Inc. noted that most of their work with Jeremy has a top goal of wildlife habitat improvement and clients have included NH Audubon, TNC, SPNHF, and multiple municipalities. In addition, Jeremy is the best at laying out a harvest, situating truck roads and landings where they make sense, and thoughtfully laying out skid roads to minimize both distance and impacts. He is always communicating with loggers, truckers, and mills to make sure everything is working out for everyone involved.

The second endorsement letter noted the shared opportunity in presenting a timber harvest tour. A crowd of nearly 40 toured the active harvest site, discussing silvicultural objectives, practical elements of timber harvesting, and the attention given to unique features of the property. "What stood out for me was how committed Jeremy was in educating the public, and showing them that timber harvesting wasn't something to be afraid of, but rather a tool for public good."

"Jeremy Turner is a valued colleague in the natural resources field and a region-wide leader. He is the forester you want representing you in challenging conditions, as well, and he always seeks and finds an amicable way to complete the job and satisfy all parties to the best of his abilities. He is ever respectful of the land he feels fortunate to steward. His work ethic is a large part of what leads him to 'overdeliver' for the client and help them meet a wide range of management objectives, something I have experienced each time we've worked together on a project," is quoted from a third endorsement.

In returning to the nomination letter, these comments were expressed. "When setting up timber harvests, he thinks about all aspects of the forest resource and how every motion in a forest operation will impact the outcome." "He also takes great effort in supporting logger education and certification, because he understands that we need a strong and dedicated workforce to implement good forestry work." "Those who are fortunate enough to work with Jeremy will undoubtedly come away with a new perspective on a forest health issue, cultural history, wildlife interactions, or silvicultural technique." "He is clearly passionate about silviculture and always has creative ideas for on-the-ground management. Whenever we work with Jeremy on a forest management project, we know that project will be planned and overseen to a very high standard." "He doesn't just tell someone what to do, he explains in great detail the 'why' it should be done in a certain way. Jeremy's passion for sustainable forestry is exceptional and contagious."

Austin Cary Award Recipients

1989 – Lynn Levine
1990 – Stephen Orach
1991 – William H. Rivers
1992 – Paul Memmer
1993 – Charles Gadzik
1994 – Don & Nina Huffer
1995 – John McNulty
1996 – Bruce Spencer
1997 – D. Jensen Bissell
1998 – Charles Moreno
1999 – Fred A. Huntress
2000 – Michael Bartlett
2001 – Anne Marie Kittredge
2002 – Joel B. Bronson
2003 – Glenn Freden
2004 – Leland H. Sanders
2005 – Anthony Filauro
2006 – Geoffrey T. Jones
2007 – George F. Ritz
2008 – Si Balch
2009 – Kevin Evans
2010 – John A. O'Brien
2011 – Carol L. Redelsheimer
2012 – Stephen C. Coleman
2013 – Ronald Klemarczyk
2014 – Douglass "Bill" Mahan
2015 – Brooks McCandlish
2016 – Tom Hahn

2018 – Elizabeth (Betsy) Lesnikoski
2019 –
2020 – Barrie Brusila
2021 –
2022 – Peter Farrell

Tony D'Amato

Ernest M. Gould Jr. Technology Transfer Award

The Ernest M. Gould Jr. Technology Transfer Award is given for outstanding contributions to natural resource science and management through education, extension, or youth service. Gould achieved wide acclaim for his expertise in analyzing and resolving forest resource policy issues while on the faculty of Harvard University. He was a graduate of the University of New Hampshire.

"There are those of us whose job description includes the expectation that we will dedicate some of our time to the education of landowners, foresters, and key decision makers. Then there are those whose passion for forests and forestry compel them to educate people. Tony D'Amato falls into the later category and we in new England have all benefited," states the nomination letter. It then proceeds to provide a listing of the breadth of select outreach publications, recent service activities, and other outreach activities. "I would venture to say that **most** of the foresters on NESAF have benefitted directly from Tony's technology transfer in some way, shape, or form."

Tony's biographical sketch is equally extensive, his education includes a B.S. in Forest Ecosystem Science from U. ME in 2000, a M.S. in Forest Science from Oregon State Univ. in 2002, and a Ph.D. in Forest Resources from the U. MA in 2006. He has served as a research assistant and postdoctoral fellow at U. MA from 2002-2007, an Assistant and then Associate Professor at U. MN for 2007-2012 and still serves as an Adjunct Professor at that Univ. He returned to New England in 2015 as an Associate Professor at UVM, and since 2018 serves as Professor and Director of the Forestry Program. He has taught both undergraduate and graduate level courses in his 15 years of teaching experience, while providing direct supervision of 30 M.S, 12 Ph.D., and 13 post-doctoral students/associates. He is currently serving as an Associate Editor for three journals (Ecology, Ecological Monographs, and the SAF Forest Science). His SAF service includes for example, involvement at the levels of national as the Regional Representative (Northeast) for the Forest Science and Technology Board since 2019, regional (NESAF) as the Forest Science Coordinator for the 2015-2022 period, and for the Green Mountain Division, where he was the Chair (2019-2022).

"He is the total package of forestry communications, transfer, and outreach. He is a world-class scholar, researcher, and teacher who understands and works uniquely well in the 'real world.' He has had and continues to have an outsized positive impact on forestry in Vermont," states one letter of endorsement.

The second endorsement notes, "Tony has been a huge asset in Vermont in so many ways. Here at the Vermont Land Trust, we know him as a true collaborator and a generous contributor to the greater knowledge of the hundreds of forest landowners with whom we work. Whenever, we ask him for help, he always obliges. He has led numerous educational field trips and webinars on our behalf, on emerald ash borer, climate-adaptive silviculture, old-growth forests, and other topics.. Tony is a gifted teacher, who can make complex topics easily understood by any audience."

"A few years ago, Tony was on a panel discussion at a national SAF conference. The panel was called "Is silviculture dead?" I believe Tony answered that question. He has almost single-handedly led a silviculture renaissance in New England. Given the amount of focus on forests and the challenges they face, the timing of his work couldn't be better. His technology transfer deserves recognition and appreciation for the impacts it is having on our forests."

Joseph Orefice

Mollie H. Beattie Young Forester Leadership Award

The Mollie H. Beattie Young Forester Leadership Award is presented to a member of NESAF less than 40 years old who has shown leadership in a program or project benefiting the practice of forestry. Beattie was Vermont Commissioner of Forests, Parks, and Recreation, Deputy Secretary of the Agency of Natural Resources, and ultimately became Director of the U.S. Fish and Wildlife Service. Beattie was active in SAF. She co-authored ***Working with Your Woodland****; she is remembered for her tireless devotion to conservation, integrity, and quiet courage.*

Joe received a 2007 B.S. in Forestry from the Univ. of ME, a 2009 M.F. degree from Yale University, and his Ph.D. in 2015 from the Univ. of NH which focused on temperate silvopasture systems. He currently serves as a Lecturer and Director of Forest and Agricultural Operations at The Forest School of the Yale School of Environment (YSE). Joe teaches courses in agroforestry and forest management, while overseeing forestry operations and applied educational opportunities on the 10,880-acre Yale Forests system. Previous professional experiences include being the Maple Specialist and Director of the Uihlein Forest for Cornell University for 2016-2017 and prior to that serving as an Associate Professor at Paul Smith's College for 2009-2017 and their Forestry Program Director for 2016-2017.

The nomination letter gives the highest accolades to Joe for his work and ability to teach due to his down-to-earth knowledge, teaching and engaging students in a way that is very different from the more remote and academic styles that many faculty here at Yale, and I suspect elsewhere, have. "In terms of research… my professional and personal belief that Joe has the ability to become the unquestioned leader of the practice of silvopasture and other aspects of agroforestry in the northeast (and perhaps well beyond)." The nomination notes that Joe leads an annual "southern field trip during the two-week March break to allow students to both experience and engage in land management issues in the southern US.

The first endorsement letter is a joint recommendation, and it notes, "Joe broadened his professional experience through numerous unique opportunities, including times as a consulting forester, a summer research and education intern at the Temperate Forest Foundation, a CT Lands Management Forest Technician, and as the Forestry Program Director as Paul Smith's College. Joe has embraced these various roles with true passion for the profession, a strong commitment to the individuals he interacted with, and a drive for continual improvement both personally and professionally." In addition, Joe currently owns and operates his own local farm (Hidden Blossom Farm), raising cattle and vegetables, and managing a woodlot.

The second endorsement was also a joint effort, noting "One of the many characteristics that set Joe apart from other students we have known or mentored during our decades as university faculty, is that he designed and successfully conducted his Ph.D. dissertation on the working farm that he established and operated in upstate New York (North Branch Farm)." Further, "In summary, it is clear to us that Dr. Orefice's research, outreach, and teaching activities have already had – and will continue to have – a tremendous impact on the science and practice of forestry. His current research program at Yale University is once again advancing the frontiers of agroforestry and forestry practices in New England through experimentation with different crop combinations and management treatments."

Jeff Ward

David M. Smith Award

The David M. Smith award recognizes a New England SAF member engaged in research, teaching, or the field application of silviculture, whose work reflects Dave's advice that ***"we should observe and analyze the patterns of stand development first, and devise silvicultural treatments to fit or modify them afterwards."***

The letter of nomination highlights Jeff's accomplishments as follows, "Jeff has devoted the past 35 years to developing a body of work that has been instrumental in guiding the silvicultural strategies used for sustaining a diversity of forest types in southern New England. His engagement with and contributions to the forest management community in the region have been exemplary and reflect someone who not only takes great care in their approach to research, but also in ensuring it has relevance to the foresters tasked with conducting silviculture on a regular basis."

A letter of recommendation notes that he initially worked as a field tech for Jeff, while Jeff was pursuing his Ph.D. at Purdue University, and how generous Jeff was in describing the patterns of forest development in those central hardwood forests. Fast forward to the end of Jeff's career, "When he and I reconnected over the application of slash walls to exclude deer from regeneration harvests. We know that deer an impact vegetation, but we needed data to describe regeneration patterns and help formulate silvicultural recommendations to grow forests in the absence of deer. Jeff's efforts with the foresters of New England were pivotal in helping to establish and demonstrate the effectiveness of walls."

Jeff's education background includes a 1979 B.S. degree from Ohio State University, which was followed by a 4-year stint in the Peace Corps providing forest extension in Guatemala. He then returned to Ohio State Univ. and received an M.S. in 1983 and then a Ph.D. from Purdue University in 1987. He began work at the Connecticut Experiment Station in 1987, serving in several positions before retiring in 2022 as the Chief Scientist/Department Head. He continues to serve to the present as the Chief Scientist Emeritus at the experiment station. For NESAF, he has served as the Forest Science Coordinator and was the 2016 Chair.

The other letter of endorsement characterizes Jeff's research contributions over four epochs. The first was his foundational papers with two mentors of silviculture, being George Parker and eastern old-growth forests and working with George Stephens on stand dynamics of second growth hardwoods. The second was work in the middle 1990s with continued research on second growth stand dynamics, effects of high grading and how to treat and restore, and the effects of deer browse on regeneration. "In the early part of this century up to the mid-teens, I can safely say he was the "King of Barberry." He explored and reported on the ways of treating barberry to control its spread and effects on suppressing regeneration and facilitating deer tick habitat." "Lastly, Jeff continues to monitor some of North America's best and longest recorded forest plots on forest dynamics as a source for understanding such forests. They continue to yield better understandings of their unpredictable dynamics, much more so than many of the snapshot observations and ecological models that have been published. His big central question today relates to "resilience" and climate change, and he has much of the data to shed light on such issues." "In summary, his research has advanced our knowledge of Southern New England forests with a focus on invasive plants and insects and understanding their impacts on the ever-changing dynamics of southern New England Mixed-Oak forests."

"My nomination of Jeff for this award comes purely from a place of admiration for his career based on my role as a silviculture professor in the region. He and I have actually never had a formal collaborative relationship beyond working on NESAF programming together, but our disciplinary interests are strongly aligned, so that I have been exposed to the impact of his work throughout my career, both in research articles and technical bulletins, as well as through his frequent presentations at regional workshops and meetings. His ability to address silvicultural questions of key relevance to managers has been something I have always admired."

James W. Toumey Outstanding Service Award

The James W. Toumey Award is given for outstanding achievement in service to the New England Society of American Foresters. Toumey was one of the founding fathers of the New England Section in 1920, author of ***Seeding and Planting*** *and* ***Foundations of Silviculture****, one of the first two regular staff members at the Yale School of Forestry. Henry S. Graves noted in a memoriam* ***"Almost at once he took a prominent place in the forestry movement and throughout his career was in the foremost ranks of the leaders of the profession.***

SAF Fellows

Listing of current NESAF members (Year Elected, Name)

Current Fellow criteria require both of the following: 1) A strong commitment through direct SAF volunteer activities, and 2) exemplary action, sustained leadership, and advancement of the forestry profession in at least one of the following areas: a) application of forestry, b) education, c) public policy, d) research, or e) technology transfer. Both criteria need to be typically demonstrated and performed at two or more levels (local, state, regional, national, or international).

1986 – Clifton E. Foster
1988 – Peter R. Hannah
1989 – Maxwell L. McCormack, Jr.
1991 – Walter R. Gooley, Jr.
1993 – Jane A. Difley
1996 – William B. Leak
1997 – Lloyd C. Irland
1998 – Robert M. Frank, Jr. James W. Hornbeck
1999 – David B. Field Donald W. Floyd
2000 – Hans T. Bergey
2001 – Charles A. Levesque
2002 – Robert M. Ricard, CF
2003 – Anthony Filauro Fred A. Huntress, Jr.
2004 - Barbara M. Schultz
2005 – James B. Cullen Mervin E. Stevens
2006 – Bradford A. Wyman
2007 – William R. Bentley
2008 – Kenneth M. Laustsen, CF Carol L. Redelsheimer Robert S. Seymour
2010 – George F. Frame
2011 – Sidney E. Balch, CF
2012 – Karen P. Bennett, CF
2013 – Dr. Susan P. Romano, CF
2015 – Michael H. Dann
