

# Rehabilitation Silviculture for Small Woodlots

**Beech management, pine-oak  
regeneration and protection.**

This all day field tour is planned for June 19th in Windsor, ME on a woodlot formerly dominated by low-value diseased beech and hemlock. Tour participants will see the results from ongoing operations using various vegetation control and artificial regeneration methods available to small woodlot managers. Emphasis is placed on regenerating white pine and red oak on this woodlot. Presenters will cover topics including: best management practices, soils, beech bark disease, herbicides, planting seedlings and acorns, protections from weevils and deer, investment decision tools and growing high value sawlogs.

If you **do not** want your contact information listed on the meeting attendance list to be distributed in registration packets, please check the box below.

I **do not** want my contact information distributed.

**CARPPOOLING**

If you are interested in carpooling please check the box below and your name, town, email and phone # will be listed on our website for other attendees to contact. Since parking at the woodlot is limited we encourage participants to meet at 8am at the Hannaford parking lot in South China (Hwy 202 & 32).

Please post my contact information for carpooling purposes.
